

VIBHA BHAVIKATTI

vibha.bhavikatti@sjsu.edu — +1 (408) 201-4426 — linkedin.com/in/vibha-bhavikatti/ — github.com/vibhab4/ — San Jose, CA

EDUCATION

San José State University, San Jose, California
Master of Science in Computer Science

August 2024 - June 2026 (Spring 2026)

American University of Sharjah, Sharjah, UAE
Bachelor of Science in Computer Science, Minor in Data Science

September 2020 - June 2024

Dean's List Honoree: Fall 2020, Spring 2021, Fall 2021

Chancellor's List Honoree: Fall 2021

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Software Engineering, Machine Learning, Database Systems, Artificial Intelligence, Deep Learning, NLP, Cloud Computing, LLM, Linear Algebra, Statistics, Quantitative Analysis, Agentic AI

SKILLS

- **Programming:** Python, Java, Swift, R, MySQL, C, C++, JavaScript, TypeScript, Golang, Rust, Bash, HTML/CSS, Linux (CLI)
- **Frameworks & Libraries:** TensorFlow, Keras, PyTorch, scikit-learn, React, Flask, Qt, REST APIs, Docker, Kubernetes, MongoDB
- **LLMs & AI/ML:** Hugging Face Transformers, LLaMA 3, RoBERTa, OpenAI API, Reinforcement Learning Agents
- **Agent-Based Frameworks:** Cursor, Copilot
- **Cloud & DevOps:** Google Cloud Platform (GCP), AWS (EC2, Lambda, S3), Git, CI/CD, Agile Workflows

EXPERIENCE & LEADERSHIP

Scale AI

Aug 2025 - Present

Technical Advisor Intern - GenAI

- Evaluated LLM reasoning and failure modes at scale; contributed structured insights to improve generative AI reliability and integration into developer workflows.
- Designed prompt variations and agent-style evaluation tasks to analyze model behavior under edge cases and ambiguous user input.
- Developed simulation-based pipelines and custom metrics to automate evaluation of LLM outputs, enabling large-scale analysis of AI performance; used **Selenium** and Locust for **task automation** and workflow testing.

Google Developer Groups (GDG) – SJSU

Technical Lead

August 2025 – Present

- Lead AI/Cloud technical sessions and mentor student developers on scalable system design and Google Cloud tools.

Emirates Fast Food Company LLC – McDonald's UAE

Information Technology Intern

Sharjah, UAE

June 2023 - July 2023

- Resolved IT support tickets via the Ivanti service desk and automated database workflows, improving system uptime by **~10%**.
- Assisted with database management, automation tools, and product pricing workflows.

American University of Sharjah

Teaching Assistant

Sept 2022 – May 2024

- Mentored **100+** students in Programming I, Programming Languages and Digital Systems; provided hands-on support in lab sessions and code reviews. Assisted professors with grading, documentation, debugging, and course support across 4 semesters.

PROJECTS

CareMap (UC Berkeley AI Hackathon) | React, FastAPI, Claude 3

June 2025

- Collaborated in a **3-person** team to build an AI-driven real-time crisis support web app mapping 200+ SF shelters, food banks, and restrooms using Leaflet.js and web-scraped data (BeautifulSoup); **optimized workflows** for speed and minimal user interaction.
- Used Claude 3 as a chatbot for real-time support and location queries; reduced manual search time by **~60%**.
- Led frontend development in **React/Typescript** and TailwindCSS; deployed full-stack app using Node.js and FastAPI.

CodeForge – Daily Coding Challenge Platform | React, TypeScript, Firebase, Docker, AWS, CI/CD

April 2025

- Built a full-stack **React/TypeScript platform** delivering daily coding challenges with Firebase for user management and session state, prioritizing user engagement and learning outcomes.
- Developed unit + E2E tests (Vitest, Cypress) in CI/CD pipelines; enforced automated quality gates with GitHub Actions.
- Deployed using Docker containers with **AWS services** (EC2, S3) and Render, released as a trial to **30 users** while ensuring **scalable releases and reliable service availability**.

Big Data Systems Exploration and Applied Analytics (Academic Focus)

January 2025 - May 2025

- Developed ETL pipelines and RESTful APIs in Java 11 to ingest and process multi-million record datasets across distributed systems.
- Built **indexing and retrieval workflows** using Hadoop, Spark, and Hive to optimize queries and evaluate performance trade-offs.
- Designed schemas in Hive Metastore and coordinated distributed storage (HBase, ZooKeeper) with data validation and access control for scalable, fault-tolerant access.

Traffic Sign Detection & Localization | YOLOv3/YOLOv8, OpenCV, Google Cloud

Dec 2024 – Feb 2025

- Trained **YOLOv3** and **YOLOv8** object detectors on the GTSRB dataset for real-time sign detection and localization.
- Deployed scalable inference pipelines on **Google Cloud**, achieving robust multi-class detection performance.
- Implemented data preprocessing, augmentation, and evaluation tools for production-quality vision workflows.

COMPETITIONS

KIBO Robot Programming Competition

April 2023 – October 2023

JAXA and NASA

- Simulated and developed Astrobbee's laser-based ammonia leak detection and autonomous QR code scanning; final solution was executed aboard the **International Space Station (ISS)**, achieving **1st** place in the UAE and **6th** globally.
