vibha.bhavikatti@sjsu.edu — +1 (408) 201-4426 — linkedin.com/in/vibha-bhavikatti/ — github.com/vibhab4/ — San Jose, CA

EDUCATION

San José State University, San Jose, California
Master of Science in Computer Science

August 2024 - June 2026 (Spring 2026)

American University of Sharjah, Sharjah, UAE
Bachelor of Science in Computer Science, Minor in Data Science

September 2020 - June 2024

Dean's List Honoree: Fall 2020, Spring 2021, Fall 2021

Chancellor's List Honoree: Fall 2021

Relevant Coursework: Software Engineering, Data Structures and Algorithms, Operating Systems, Machine Learning, Database Systems, Artificial Intelligence, Deep Learning, NLP, Cloud Computing, LLM, Linear Algebra, Statistics, Reinforcement Learning, Computer Networks

SKILLS

- **Programming:** Python, Java, Swift, R, MySQL, C, C++, JavaScript, TypeScript, Golang, Linux (CLI), Rust, Bash, HTML, CSS
- **Frameworks:** Keras, TensorFlow, PyTorch, React, Flask, scikit-learn, Qt, REST APIs, Docker, Kubernetes, MongoDB
- **LLMs & NLP:** Hugging Face Transformers, LLaMA 3, RoBERTa, LangChain, OpenAI API
- **Big Data:** Hadoop, MapReduce, Hive, Spark, Data Ingestion, ETL, Data Integration, Data Modeling, Schema Design, SQL, DDD
- **Cloud & Workflow Orchestration:** Google Cloud Platform (GCP), AWS (EC2, Lambda, S3), Git, REST APIs, Agile, CI/CD

EXPERIENCE & LEADERSHIP

Scale AI

Aug 2025 - Dec 2025

Technical Advisor Intern - GenAI

- Evaluated LLM reasoning and failure modes at scale; contributed structured insights to improve generative AI reliability and integration into developer workflows.
- Designed prompt variations and agent-style evaluation tasks to analyze model behavior under edge cases and ambiguous user input.
- Developed simulation-based pipelines and custom metrics to automate evaluation of LLM outputs, enabling large-scale analysis of AI performance; used **Selenium** and Locust for **task automation** and workflow testing.

Google Developer Groups (GDG) – SJSU

Technical Lead

August 2025 – Present

- Lead AI/Cloud technical sessions and mentor student developers on scalable system design and Google Cloud tools.

Emirates Fast Food Company LLC – McDonald's UAE

Sharjah, UAE

Information Technology Intern

June 2023 - July 2023

- Resolved IT support tickets via the Ivanti service desk and automated database workflows, improving system uptime by **~10%**.
- Assisted with database management, automation tools, and product pricing workflows.

American University of Sharjah

Sept 2022 – May 2024

Teaching Assistant

- Mentored **100+** **students** in Programming I, Programming Languages and Digital Systems; provided hands-on support in lab sessions and code reviews. Assisted professors with grading, documentation, debugging, and course support across 4 semesters.

PROJECTS

CareMap (*UC Berkeley AI Hackathon*) | *React, FastAPI, Claude 3*

June 2025

- Collaborated in a **3-person** team to build an AI-driven real-time crisis support web app mapping 200+ SF shelters, food banks, and restrooms using Leaflet.js and web-scraped data (BeautifulSoup); **optimized workflows** for speed and minimal user interaction.
- Used Claude 3 as a chatbot for real-time support and location queries; reduced manual search time by **~60%**.
- Led frontend development in **React/Typescript** and TailwindCSS; deployed full-stack app using Node.js and FastAPI.

Forecasting Future Events Using Sentiment Trends With WORLDREP Database

April 2025 - May 2025

- Developed a time-series forecasting pipeline to predict protests using 30-day sentiment- news windows from the WORLDREP dataset, using **BigQuery** for large-scale data extraction and preprocessing.
- Engineered NLP-derived features (sentiment score, polarity) and trained LSTM and Transformer models in PyTorch, achieving a **0.60 F1-score** on event prediction tasks.
- Designed interactive dashboards to visualize forecasts and interpret key sentiment-driven predictors influencing event likelihood.

AI-Powered News Bias & Sentiment Analyzer | *Flask, REST APIs, LLaMA 3, Hugging Face Transformers*

April 2025

- Created a Flask-based **NLP** tool using RoBERTa, LLaMA 3, and PoliticalBiasBERT to detect article sentiment and bias.
- Automated scraping with DuckDuckGo + REST APIs; supported **LLM-based summaries** using **Hugging Face Transformers**.
- Integrated CI checks using GitHub Actions within a Git-based workflow to automate quality gates and streamline deployments.

Traffic Sign Detection and Localization (Capstone Project) | *YOLOv3/YOLOv8, GCP, React, Python, UAT* Oct 2023 - May 2024

- Collaborated with **iEngineering** to build a detection system for traffic signs (YOLOv3/YOLOv8), achieving mAP@0.5 of **96.1%**.
- Implemented a GCP-based platform to upload, de-duplicate, and **index large annotated datasets**, surfacing geo-tagged traffic signs with searchable metadata.
- Optimized inference for **real-time retrieval with <1s latency** using GPU acceleration and load testing on cloud infrastructure.

COMPETITIONS

KIBO Robot Programming Competition

April 2023 – October 2023

JAXA and NASA

- Simulated and developed Astrobree's laser-based ammonia leak detection and autonomous QR code scanning; final solution was executed aboard the **International Space Station (ISS)**, achieving **1st** place in the UAE and **6th** globally.

AI Week: Empowering Digital Health Education With AI - Machine Learning Hackathon

March 2022

- Developed a CNN-based COVID-19 detector to detect COVID-19 patients X-rays, placing **4th** with a detection accuracy of **97.21%**.
